Projects

Trello

Rails, PostgreSQL, JavaScript,
React, Redux

<http://trello.review>

Summary: Wrote a clone of the popular project management tool Trello as a single page app using React and Rails

- Executed secure authentication by using BCrypt to encrypt passwords in the PostgreSQL Database
- Deployed RESTful JSON API built in Rails to provide data to the React/Redux frontend via jBuilder and AJAX query methods
- Improved upon original Auth functionality by creating an AuthRoute tag that prevents logged in users from seeing the login and signup page
- Utilized Redux architecture that improves efficiency and maintainability of the project with normalized state.

SharpSwiper

Javascript, HTML, CSS

<https://thrage1.github.io/sharpshooter/>

Summary: Created a swiping game designed to strengthen mouse-eye coordination. Built entirely with JS, HTML, and CSS

- Asteroids react to swipe of the mouse and display explosion on swipe keeps score and updated the user on lives left
- Uses Spritesheets for the animation effects
- Efficiently recycles the asteroids when they are destroyed by redeploying them to the top of the page

Minique

JavaScript

Summary: Reimplemented an MVP of jQuery to learn the facade pattern

- Handles lightweight DOM manipulation across browsers
- Implemented entirely in vanilla JavaScript

Skills

Frontend

JavaScript
React & Redux
jQuery

Backend

Ruby on Rails
Jbuilder
Rspec
SQL (Postgres)

Miscellaneous

Git/Github
NPM
Webpack

Non-Technical

Fluent in English
Fluent in Russian
CPR Certified

Experience

Ohel / Bais Ezra
